Alberdingk Boley, Inc Introduces ALBODUR® Castor Oil Polyols for Floor Coatings

Greensboro, NC
January 15, 2007

Alberdingk Boley is pleased to launch ALBODUR®, a new product line of 100% solids castor oil polyols (COPO) for zero VOC, 2-pack flooring applications.

ALBODUR® COPOs are based on renewable resources and are hydrophobic in nature. These low viscosity branched polyols are zero VOC and provide coatings formulators the ability to choose from a variety of isocyanates as well as application methods. The ALBODUR® product line can be cross linked with isocyanates to produce high performance coatings for a variety of applications including commercial and residential flooring with a wide range of hardness and flexibility. The 2-pack coatings produced from these polyols are highly chemical and alkaline resistant, suitable for the replacement of epoxy coating systems.

Visit www.AlberdingkUSA.com for further information on these products and the contact representative for your area. Product datasheets and technical bulletins can be further found on the Chemidex Cybrary.

Alberdingk Boley, Inc., a Greensboro, NC based company, headquartered in Krefeld, Germany, specializes in waterborne resin technology for the coatings, adhesives, and printing inks industries.

ALBODUR is a registered trademark of Alberdingk Boley GmbH
