

**ALBERDINGK BOLEY announces a focus on
Waterborne Resin Technology for Concrete and Wood
at the American Coatings Show 2008**

Greensboro, NC
February 22, 2008

ALBERDINGK BOLEY INC. will exhibit its waterborne resin technology at booth 1557 at the American Coatings Show in Charlotte NC, June 2-5, 2008. Resins designed for wood and concrete coatings will specifically be showcased.

For **wood application**, ALBERDINGK will highlight three different chemistries: self crosslinking acrylic emulsions, polyurethane dispersions, and UV curable polyurethane dispersions. Specific products include:

- Alberdingk® AC2514, a robust self-crosslinking acrylic with fast dry and chemical resistance suitable for sanding sealers, topcoats, and pigmented base coats
- Alberdingk® U915, a polycarbonate based polyurethane for superior two component wood floor finishes with outstanding clarity, chemical resistance, and adhesion
- Alberdingk® LUX855, a novel non-drying UV curable resin that is an economical choice to achieve outstanding wood warmth and high gloss in a waterborne system

For **concrete application**, ALBERDINGK will highlight chemistries including epoxy acrylic hybrids, self crosslinking acrylic emulsions, and 100% solid castor oil polyols. Specific products include:

- Alberdingk® M2959, an epoxy acrylic hybrid with water resistance and fast dry suitable for a variety of concrete floor coatings including stains, clears, and pigmented
- Alberdingk® AC2314, a self-crosslinking acrylic with high one component performance in blush, hot tire, and chemical resistance suitable for a top of the line concrete sealer or topcoat
- ALBODUR 912, a 100% solid castor oil based polyol for a high performance two component thick film coating with zero VOC

Further details of these substrate specific technologies will be presented by the ALBERDINGK technical department in the poster sessions on June 2 and 3. Ivan Tyre will be presenting "Utilization of Polyurethane-acrylic Blends to Achieve Optimum Performance in a 1K Water-based Wood Floor Coating." Mike Praw will be presenting "Low VOC Concrete Coatings: Technology and Performance."

Following tradition, attendees of the show are invited to "Drink with Alberdingk" at the ALBERDINGK booth throughout show hours.

Alberdingk Boley, Inc., a Greensboro, NC based company headquartered in Krefeld, Germany, specializes in waterborne resin technology for the coatings, adhesives and printing inks industries.
